

## Partnership Plan 2018 - 2019

---

## Strategic Assessment

Safer North Hampshire Community Safety Partnership (CSP) produces an annual Strategic Assessment which it reviews every six months. This ensures that the partnership is aware of current and emerging trends.

Police forces across England and Wales have improved the way that they record crime. As a result, police recorded crime and anti-social behaviour both locally and nationally has risen.

In 2016/17 total crime across Safer North Hampshire increased by **8%** (n1, 660). Much of this rise can be accounted for by a 12% (n858) increase in violence against the person offences, which is largely due to improved recording practices and expansion of offence categories. Anti-social behaviour increased by 4% and domestic abuse increased slightly (+1%). Many of these offences were linked to alcohol consumption. These issues have been identified as the primary threats for Safer North Hampshire and as such our priorities for the upcoming year will remain as;

- Anti-social behaviour – Anti-social behaviour was widespread across all three areas. It has the potential to affect individual lives and whole communities, and, if not dealt with efficiently and effectively, can quickly escalate. Over the coming year the partnership will continue its work with victims and perpetrators of ASB.
- Alcohol related violent crime – The impact of alcohol is a key theme and facilitator for criminal behaviour. Alcohol related offences increased across Safer North Hampshire. A considerable proportion of alcohol related offending occurred in the town centre beats, at night and around licensed premises. As such over the coming year Safer North Hampshire will focus on reducing violence against the person offences with and without injury.
- Vulnerabilities – Vulnerability is high on the CSPs agenda and relates to everything the partnership deals with. From prevent, child sexual exploitation and modern day slavery, to domestic abuse, hate crime and anti-social behaviour, vulnerable people are at the forefront of the work of the Community Safety Partnership and will remain to be over the coming year.
- Substance misuse – A number of issues surrounding substance misuse have been highlighted in the Strategic Assessment. Almost a fifth (18%, n4086) of offences were linked to alcohol and in addition levels of street drinking have been of concern. Over the coming year Safer North Hampshire will continue to focus on these issues.

## Away Morning

Community Safety Partners were invited to an Away Morning at The Connaught Centre in Aldershot in April 2018. The focus of the morning was to: look at current service provision against priority areas, identify gaps in provision, best practice, project development or new projects required to bridge gaps in provision.

It is important to note that a number of projects established as a result of previous Action Plans continue to run with the support of the Community Safety Partnership, reporting progress to the Strategic Partnership on a regular basis.

The workshop focused on four areas linking into the priorities identified by the annual Strategic Assessment. These areas were:

1. Vulnerable Adults
2. Vulnerable Children
3. Exploitation
4. Data Sharing

Key points raised at the workshop included:

- The need for multi-agency practitioner training on Exploitation
- Safeguarding training for high profile professions e.g. Taxi Drivers
- Press campaign on Exploitation
- Refreshed Partnership Information Sharing Protocol
- A risk management plan for Vulnerable Adults that all partners could use
- Expansion of Safer North Hampshire education programme
- Parent education sessions on topics including drugs, alcohol and internet safety

Following the workshop information gathered was collated into this Partnership Plan for action in the financial year 2018 – 19.

Progress will be monitored throughout the year via through the Strategic Community Safety Partnership. Project managers are expected to submit progress reports to the Strategic Community Safety Partnership operating on a traffic light system.

Overall responsibility for the success of the projects will fall to the Strategic Community Safety Partnership. If a project is at risk or requires intervention to ensure success, the Management Team will intervene to make any necessary changes.
